

7/30/17 – Bryan Barrows

SYNTHESISPLLC.COM

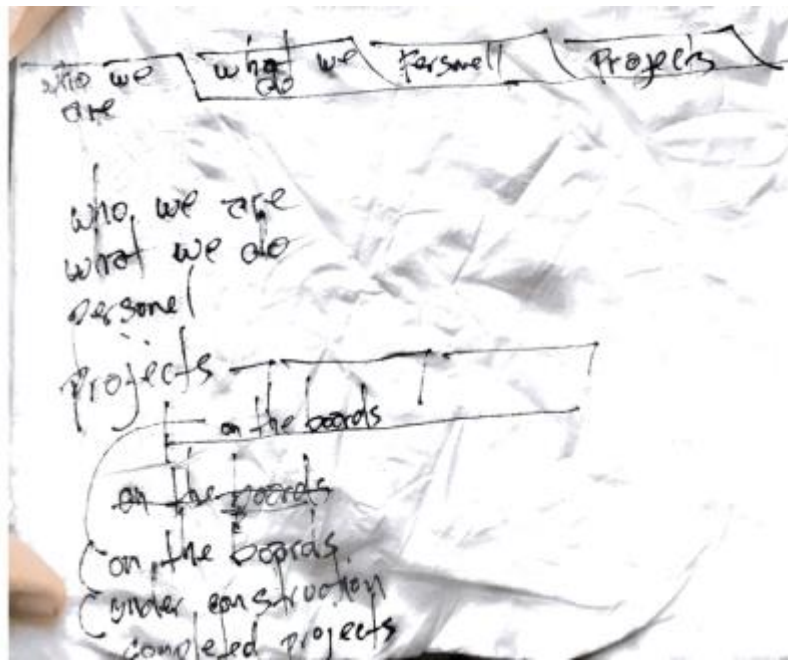

1. SYNTHESIS PLLC

Synthesis PLLC is an architecture firm based in Bellevue, WA.

There is currently a placeholder page at <http://www.synthesispllc.com/>

A. Client Wishes

- i. Randy is the Principal Architect / Owner of the company and wants the page to convey his artistic side. He'd specifically like to have a section to feature projects, which are 'on the boards', 'in-progress', or 'completed'.
- ii. I saw Randy over the weekend and he drew this sketch:

2. CLIENT WISHES

Client wants updated photos and to move past his placeholder site.

He'd also like to be able to easily update new drawings and work, though he's not particularly tech savvy.

He'd like the top navigation to read: who we are, what we do, personnel, projects.

We will probably use a carousel home-page with photos of recent projects that you can click into. However, we'd also talked about using a cool sketch as a landing page with different parts as buttons.

We will stick to the bootstrap template and getting something presentable to start.

For inspiration, we viewed <https://mg2.com/> ... we liked the design and would maybe want something similar, but want it to be simple and responsive, but also classy and to represent his design.
